

PREPARE THE DATASET

TEAM ID: PNT2022TMID54007

PROJECT NAME: Global Sales Data Analytics

We must prepare the data after you load it.

- Prepare calculations for the fields for the year, month, and day, as well as the associated navigation path.
- Create some additional calculations, like target sales, minimum sales, maximum sales, and middle range sales.

The screenshot shows the Power BI Desktop interface. On the left is the 'Data module' pane, which contains a search bar and a list of data sources. The source 'Global_Support2.csv' is selected and highlighted with a blue box. Below it are several tables listed with their columns: '# Row Id', '# Row ID', 'abc Order ID', 'Order Date', 'Ship Date', 'abc Ship Mode', 'abc Customer ID', 'abc Customer Name', 'abc Segment', and 'City'. On the right is the main workspace, currently displaying the 'Relationships' view. It shows a single table named 'Global_Support2.csv' with columns: 'Row Id', 'Row ID', 'Order ID', 'Order Date', 'Ship Date', and 'Ship Mode'. The table contains 8 rows of data.

Row Id	Row ID	Order ID	Order Date	Ship Date	Ship Mode
1	32298	CA-2012-124891	2012-07-31	2012-07-31	Standard Class
